October 15th, 2020

PCC Members,

As we move closer to colder weather, with schools open and the anticipation of flu season during the ongoing COVID pandemic, we expect that PPE will continue to be a necessity to keep ourselves and our communities safe.

Our partner, Ferno Canada has made a generous offer to all PCC Members.

Ferno's reusable Face Shield has received a lot of positive feedback for its quality and design and they would like to offer this important piece of protective equipment to the PCC membership at a significantly reduced price. A guaranteed collective order of 50,000 shields through the membership would allow Ferno to extend a low price of just \$2.90 per shield.

Based upon the larger collective quantity, Paramedic Services would have the opportunity to purchase the exact quantity they require at the same great price. Ferno is asking that services are able to commit to purchase at least 50,000 shields over six months to be able to take advantage of the group discount.

Below is a mock-up of the face shield, free from any corporate logos. The imprint may be altered, if desired, however all 50,000 face shields must use the same imprint design.

The Paramedic Chiefs of Canada would like to thank Ferno for their support and generous proposal during this challenging time for the Paramedic Community.

If you are interested in this proposal, please feel free to contact either Abby Fernandes or Kelly Nash at the below email address.
